Subject: 4/4/08...40th anniversary of the assasination of Dr. Martin Luther King

In honor and in respect to the man who made the ultimate scarafice, his life...I forward Dr King's 1967 speech as a reminder of the degree of courage and strength that was required to be able to stand and speak these profound truths. If to apply to today's current events, all that would be required is the removal of the word Vietnam only to replace with the word Iraq. Often we forget or aren't informed enough to know that Dr. King was more than the I Have a Dream dreamer, but, that he was a revolutionist.

Shortly after giving this speech, Dr. King was DISinvited to the white house and almost one year to the date, was murdered.
